SUBJECT INDEX TO VOLUME 18

Applied surface heat flux and temperature-dependent thermal conductivity, hyperbolic Stefan problem with, 503
Arrays of interrupted plates positioned convergently–divergently along the flow direction, numerical analysis of fully developed fluid flow and heat transfer for, 309

Buoyancy-driven flow in a rectangular cavity, 129

Calculation of the turbulent buoyancy-driven flow in a rectangular cavity using an efficient solver and two different low Reynolds number k–ϵ turbulence models, 129
Combined radiation and laminar mixed convection in the thermal entrance region of horizontal isothermal rectangular channels, 113
Concentric annular duct, laminar convection in, 357
Conjugate conduction–convection heat transfer model for the valve flow-field region of four-stroke piston engines, 283
Convection cavities with heat-generating porous media, 371
Convection between confocal elliptical cylinders, 95
Convection in a concentric annular duct, 357
Correlation for laminar natural convection between confocal horizontal elliptical cylinders, 95

Effect of a centered conducting body on natural convection heat transfer in an enclosure, 213

Fluid flows over a heated cylinder, 325
Four-stroke piston engines, conjugate conduction–convection heat transfer model for the valve flow-field region of, 283
Freezing in water-saturated porous media, 17
Fully developed fluid flow and heat transfer for arrays of interrupted plates positioned convergently–divergently along the flow direction, numerical analysis of, 309

Heat transfer for arrays of interrupted plates, 309
Heat transfer of laminar mist flow in concentric annuli, 243
Heat transfer for incompressible and compressible fluid flows over a heated cylinder, 325
Heat-generating porous media, natural convection in vertical cavities partially filled with, 371
Heated cylinder, heat transfer for incompressible and compressible fluid flows over, 325
High-temperature heat pipes with pulsed heat input, transient two-dimensional compressible analysis for, 483
Hyperbolic Stefan problem with applied surface heat flux and temperature-dependent thermal conductivity, 503

Isolated heat source in a rectangular enclosure, mixed convection from, 427

Laminar convection in a concentric vertical annular duct with variable properties, 357
Laminar entry flow in a pipe or channel: Effect of variable viscosity due to heat transfer across the wall, 51
Literature survey on numerical heat transfer (1988–1989), 387

Mist flow in concentric annuli, 243
Mixed convection from an isolated heat source in a rectangular enclosure, 427
Mixed convection about a rotating sphere in an axial stream, 71

Mixed convection in a horizontal channel, 173
Mixed convection in the entrance of rectangular channels, 113

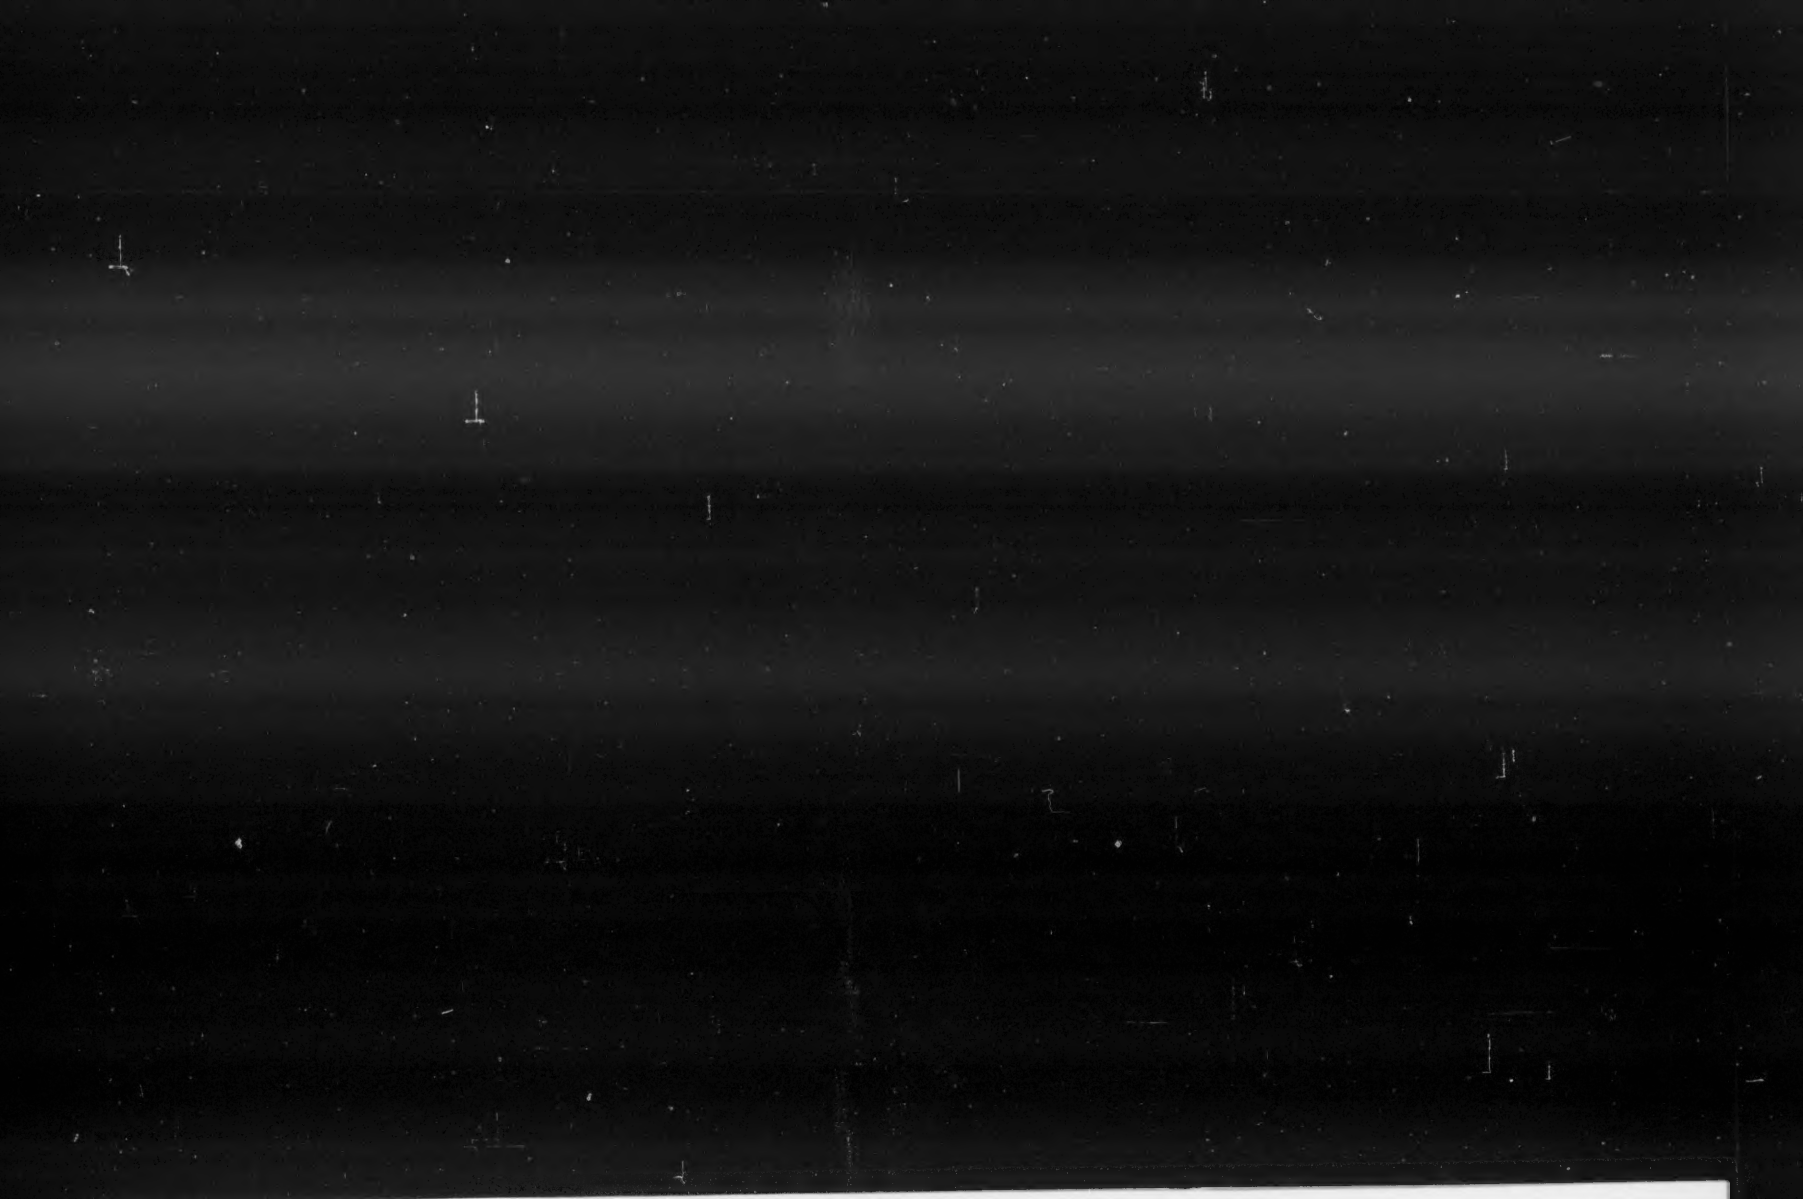
Natural convection for a centered body, 215
Natural convection in vertical cavities with partially filled heat-generating porous media, 371
Natural convection above an array of open cavities heated from below, 463
Natural convection due to side-wall heating, 343
Natural convection in a stably stratified fluid due to side-wall heating, numerical experiments on, 343
Numerical analysis of thermoacoustic convection, 1
Numerical investigation of separated transonic turbulent flows with a multiple-time-scale turbulence model, 149
Numerical study on freezing heat transfer in water-saturated porous media, 17
Numerical investigation of mixed convection heat transfer in a horizontal channel with a built-in square cylinder, 173
Numerical analyses of two- and three-dimensional thermoacoustic convection generated by a transient step in the temperature of one wall, 1

Open cavities heated from below, natural convection above an array of, 463

Piston engines, model for heat transfer in the valve region of, 283
Plane vertical plume, algebraic stress model prediction of, 263
Pulsed heat input, transient two-dimensional compressible analysis for high-temperature heat pipes with, 483

Rectangular enclosure, mixed convection from an isolated heat source in, 427

Separated transonic turbulent flows, 149
Side-wall heating, natural convection due to, 343
Stress model prediction of a plane vertical plume, 263

Thermoacoustic convection, numerical analysis of, 1
Thermocapillary cavity convection in wetting and nonwetting liquids, 33
Transient free convection about a vertical flat plate embedded in a saturated porous medium, 227
Transient natural convection in an enclosure, 191
Transient two-dimensional compressible analysis for high-temperature heat pipes with pulsed heat input, 483
Transient laminar natural convection in an enclosure from steady flow state to stationary state, 189


Valve flow-field region of four-stroke piston engines, conjugate conduction–convection heat transfer model for, 283
Vertical plate embedded in a porous medium, 227
